

Technical Data

CON*STIX*[™] Swab, SF-1

Sealed foam swab, round head

Description

CONSTIX SF-1 sealed foam swab consisting of polyurethane foam bonded to a polypropylene handle without the use of adhesives or binders.

The polyurethane foam head provides good cleaning as well as good particle entrapment and removal. Large head is ideal for cleaning and applying coatings. The absorbent foam enables solvents, such as isopropanol and ethanol, to be readily sorbed for applications involving solvent delivery or removal. Though compatible with many solvents, the SF-1 is not recommended for use with ketones, such as acetone or MEK.
