

# CONSTIX™ Swab, SF-19

## Sealed foam swab, cotton-tipped applicator

### Description

CONSTIX SF-19 sealed foam swab consists of a foam head formed over the cotton bud of a 6" cotton-tipped applicator with wood handle.

The soft, polyurethane foam head provides good particles entrapment and removal. The absorbent foam enables solvents, such as isopropanol and ethanol, to be readily sorbed for applications involving solvent delivery and removal.

No adhesives are used and the wood handles are solvent resistant and are stiff enough to allow vigorous swabbing. The SF-19 is very absorbent and resistant to most solvents; the swab is not recommended for use with ketones such as acetone or MEK. Well suited to applying solutions and adhesives. Very low in particles and fibers.

### Technical Data

Swab head material	100 PPI open-cell polyurethane foam
Swab handle material	Birch hardwood
Construction	Sealed foam over cotton-tipped applicator (CTA)

### Notes:

- 1) Data shown are typical values and should not be used as product specifications.
- 2) Valid product comparisons may only be obtained through side-by-side testing in the same test facility, under similar conditions.
- 3) Current and/or comparison data may be available. Please contact a Contec sales representative for details.
