

CONSTIX™ Swab, SF-11

Sealed foam swab, cotton-tipped applicator

Description

The SF-11 is a sealed foam swab consisting of a foam head formed over the cotton bud of a 6" cotton-tipped applicator with a wood handle.

The soft, polyurethane foam head provides good particle entrapment and removal. The absorbent foam enables solvents, such as isopropanol and ethanol, to be readily sorbed for applications involving solvent delivery or removal.

No adhesives are used and the wood handle is solvent resistant and stiff enough to allow for vigorous swabbing. Very low in particles and fibers and is well suited to applying solutions and adhesives. The SF-11 is very absorbent. Though compatible with many common solvents, the SF-11 is not recommended for use with ketones such as acetone or MEK.

Technical Data

Swab head material	100 PPI open-cell polyurethane foam
Swab handle material	Birch Hardwood
Construction	Sealed foam over cotton-tipped applicator (CTA)

Notes:

- 1) Data shown are typical values and should not be used as product specifications.
- 2) Valid product comparisons may only be obtained through side-by-side testing in the same test facility, under similar conditions.
- 3) Current and/or comparison data may be available. Please contact a Contec sales representative for details.
