

VertiKlean® Max™ Sealed Edge Mop

Disposable sealed edge foam mop head

VertiKlean MAX Sealed Edge Mop was designed for applying disinfectants to both horizontal and vertical surfaces, and is ideal for general cleaning of ceilings, walls and floors in the most critical environments. This durable, lightweight mop features thermally sealed edges of a single layer hydrophilic polyurethane foam laminated to polyester microfiber fabric, backed by a semi-rigid thermoformed plate. The sealed edge mop pad easily snaps onto a standard VertiKlean mop head frame.

Like all VertiKlean mops, the VertiKlean MAX Sealed Edge has a slim profile for cleaning in confined spaces. The ribbed microfiber material smoothly glides over floors and textured surfaces and provides superior contamination removal, while the pivoting mop head frame makes it easy to clean around door, window and filter frames, light fixtures, and heavy equipment. The sealed edge mop features unique extended flaps at the ends of the pad that bend to clean adjacent corner surfaces and up floor/wall junctions.
