

Pro-Wipe® Industrial Wipers

A portfolio of products designed to help ensure wiping efficiency through their strength, absorbency, and versatility.

At Berkshire, when contamination poses a risk, we provide the products and services you need to minimize the risk of contamination in cleanrooms, controlled environments, and other critical manufacturing areas. That is why we have designed and expanded our Pro-Wipe® portfolio of Industrial products – because we know that the smallest measure can make the biggest difference. Your work is essential, and so are your workers, so it is critical to provide them with the necessary tools to do their job effectively.

When we designed our line of Pro-Wipe® industrial wipers, we took several factors into account:

We wanted to offer wipers that reduce the risk of contamination found in traditional multi-use rags and industrial cleaning cloths. In addition, we wanted to provide a safer, cleaner, more cost-effective option. Therefore, helping to reduce quality de-fects, waste, and inefficiency. And we wanted to ensure wiping efficiency through the strength, absorbency, and versatility of the products. At Berkshire, we strive to bring you products that deliver superior performance, consistent quality, enhanced productivity, and the lowest total cost to the customer with these things in mind.

Pro-Wipe® SE

100% continuous filament polyester

Pro-Wipe® SE is an all-purpose wiper. It is an economical alternative to a standard cleanroom knitted polyester wiper.

Advantages:

- Superior durability and strength
- Pre-laundering results in reduced particle contamination
- Chemically compatible with IPA, Acetone and other solvents

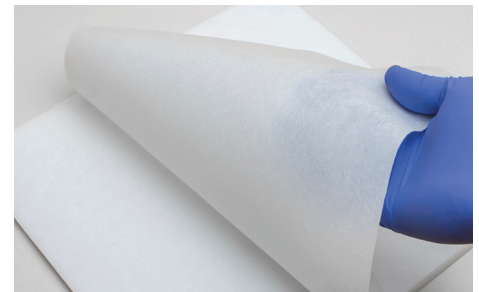

Pro-Wipe® OS

100% polypropylene

Pro-Wipe® OS is specifically designed to absorb oil and repel water.

Advantages:

- Complies with FDA 21 CFR 176.170 - 177.1520 for food grade applications (3rd party test data available)
- Excellent resistance to acids and bases
- Low linting

Pro-Wipe® AP

50% rayon/50% polyester

Pro-Wipe® AP is an all purpose wiper. It is tough enough to be a rag replacement and clean enough for a controlled environment.

Advantages:

- Smooth and soft with high strength and durability
- High absorbency compared to typical cellulose/polyester nonwoven wipers
- Low linting and abrasion resistant

Pro-Wipe® Industrial Wipers

A portfolio of products designed to help ensure wiping efficiency through their strength, absorbency, and versatility.

Pro-Wipe® SuperSorb

80% Wood pulp, 10% Lyocell, 10% Bicomponent

Pro-Wipe® SuperSorb is a medium-duty all-purpose nonwoven wiper comprised of wood pulp, lyocell, and bicomponent materials. Durable and low-linting, Pro-Wipe® SuperSorb is tough enough to be a rag replacement and clean enough to be used in a controlled manufacturing environment.

Advantages:

- No binders or other chemical additives
- Smooth and soft with good wet strength and durability
- Super heavy absorbency
- Chemically compatible with common cleaning and disinfecting solutions

Pro-Wipe® SuperSorb Lite

80% Wood pulp, 10% Lyocell, 10% Bicomponent

Pro-Wipe® SuperSorb Lite is a light-duty all-purpose nonwoven wiper comprised of wood pulp, lyocell, and bicomponent materials. Durable and low-linting, Pro-Wipe® SuperSorb Lite is tough enough to be a rag replacement and clean enough to be used in a controlled manufacturing environment.

Advantages:

- No binders or other chemical additives
- Smooth and soft with good wet strength and durability
- Highly absorbent
- Chemically compatible with common cleaning and disinfecting solutions
