

Vesta-Syde SQ Disinfectant is specifically formulated for the routine decontamination of hard, non-porous surfaces. Vesta-Syde SQ Disinfectant contains a formulation of quaternary ammonium compounds, surfactants and chelants, and is available in multiple packaging configurations. At a use dilution rate of 0.78% v/v (1:128), Vesta-Syde SQ Disinfectant kills a broad spectrum of common bacteria and fungi including *Aspergillus niger*. This product has an extensive documentation package to meet your validation objectives and is supported by the STERIS Technical Services team for individualized application and validation assistance.

## Vesta-Syde<sup>®</sup> SQ Quaternary Ammonium Disinfectant

A formulated quat with superior fungicidal efficacy

### Features

Excellent fungicidal efficacy

Broad spectrum efficacy against bacteria, fungi, and viruses using AOAC and EN protocols

Superior material compatibility

Formulated with biodegradable surfactants

Active ingredients notified according to the Biocide Product Directive and registered with the US EPA

Sterile version is gamma irradiated and each lot USP sterility tested

Manufactured in accordance with cGMP with complete lot traceability

### Benefits

Can support reduced sporicide use to control mold contamination

Confirms efficacy against many common microbes

Allows for high frequency use on most surfaces

Reduces environmental impact of disposal while maintaining excellent cleaning ability

Permits global harmonization of disinfectants

Facilitates introduction into critical areas

Supports quality assurance and quality control

### Applications

- Surface disinfection and microbial control of:
  - » Floors
  - » Walls
  - » Countertops
  - » BSL Hoods
  - » Carts and Other Equipment
- Products may be applied by:
  - » Mopping
  - » Wiping
  - » Spraying

<sup>1</sup>Products that fall into the categories at the bottom of the pyramid are most frequently used and are generally not sporicidal. Progression up the pyramid indicates stronger performance overall and a broader spectrum of claims.

The foundation of any contamination control program is the disinfectant that should be used daily. Disinfectants should be used on a scheduled rotation with a sporicide based on your environmental data. Historically, multiple disinfectants have been rotated, but if your disinfectant has broad spectrum efficacy this is not required. The family of Vesta-Syde SQ Disinfectants offers excellent material compatibility for daily use and fast, broad spectrum efficacy with superior fungicidal efficacy. Our Technical Service group can help customize your contamination control program to take advantage of this excellent product.

## Ordering Information (Worldwide)

### Vesta-Syde SQ Quaternary Ammonium Disinfectant

Filtered for consistent quality for use in a variety of areas

Description	United States	Canada	Europe
1 gallon (3.78 L) bottle (4 per case)	633508	633508CA	633508EC
55 gallon (208.2 L) drum	633501	-	-

### Vesta-Syde SQ st Quaternary Ammonium Disinfectant

Double bagged and gamma irradiated through a validated process for easy introduction into your aseptic areas

Description	United States	Canada	Europe
2 oz (59.1 mL) pouch (144 per case)	634029	634029CA	634029EC
1 gallon (3.78 L) bottle (4 per case)	634008	-	634008EC
